SUBJECT INDEX

A

Acetaldehyde in blood, spectrophotometric method for determination of, 983
Acidosis, diabetic, potassium administration in, 842
Adrenal cortical hormones, serum cholesterol a probable precursor of, 504
Adrenocorticotropic hormone, effect of, upon uropepsin excretion, 899
Aerosporin, in vitro sensitivity of Bacillus proteus and Pseudomonas aeruginosa to, 205
of coliform bacilli to, 188
Agglutination by influenza virus, susceptibility of human erythrocytes to, 538
Albino rats, pregnant, studies on beta-glucuronidase activity in, 940
Albumin-fortified and unfortified blocking-type Rh antiserum, preservation of, with sodium azide, 988
Alcohol inactivation technique for detection of prostatic acid phosphatase in serum, 161
Amino acids in blood and urine, improved method for determination in small samples of, 640
utilization of, by patients following surgery, 385
Aminopterin, effect of, on blood lymphocytes and lymphatic tissue of intact and adrenalectomized mice, 271
Ampin, an automatic ampule injector for routine and emergency hypodermic medications, use of, 795
Anaerobes, detection of motility among, use of a semisolid medium for, 652
Analytical method for Hg, Bi, Sb, and As in biologic material, a simple and rapid, 146
Anemia, pernicious, effect of vitamin B_{12} on urinary phenol fractions in, 35
folic acid in treatment of, long-term evaluation of, 894
vitamin B_{12} concentrate in maintenance of, 713
sickle cell, aplastic crisis in, 721
Anhydrohydroxyprogesterone and progesterone, comparative study of oral administration, 265
Antibiotics, effect of nine, on experimental typhoid infections in mice, comparison of, 663
in vitro sensitivity of Bacillus proteus and Pseudomonas aeruginosa to seven, 205
of coliform bacilli to seven, 188
neomycin and other, effect of, on bacteria, viruses, and protozoa, study of, 428
Anticoagulant No. 63 (4-hydroxycoumarin), effects of, upon prothrombin time in dogs and human beings, 8
Antiserum, Rh agglutinating, preservation of, by sodium azide, 297
Aplastic crisis in sickle cell anemia, 721
Apparatus for colloid osmotic pressure determination, improved design of, 117
for exercising a patient in the recumbent position, 317
Artifactual values of serum precipitable iodine, 280
Aspirin therapy, renal excretion of salicyl derivatives during, influence of urinary pH on, 237
Atherosclerosis, chylomicronemia, and fat tolerance, 373
Aureomycin in blood and urine, fluorophotometric estimation of, 123
in body fluids, simple method for routine assay of, 660
in vitro sensitivity of Bacillus proteus and Pseudomonas aeruginosa to, 205
of coliform bacilli to, 188
treatment of pneumococcic pneumonia with, 215
Auricle, right, and coronary sinus of dogs, venous catheterization of, cardiac lesions following, 287

B

Bacilli, enteric, endotoxins of, tolerance to action of, in patients convalescent from typhoid and paratyphoid fevers, 911
paracolon, tetrathionate broth in isolation of, 654
Bacillus, cereus, growth of, in broth, effect of high serum concentration on, 658
proteus and Pseudomonas aeruginosa, in vitro sensitivity of, to seven antibiotics, 205
Bacitracin, in vitro sensitivity of Bacillus proteus and Pseudomonas aeruginosa to, 205
of coliform bacilli to, 188
Bacteria, effect of neomycin and other antibiotics on, study of, 428
Bacteriostatic action of sulfadiazine, effect of procaine penicillin on, 63
Bank blood, Brucella studies on, in a general hospital, 440
Basal metabolic rate, effect of a perforated eardrum upon, 348
Beef heparin, commercial, effects of intravenous administration of, on thrombocyte count and heparin sensitivity in man, 699

Beryllium, distribution and excretion of, effect of citrate salts and other chemical factors on, 854
Beta-glucuronidase activity in pregnant albino rats, studies on, 940
Biochemical studies on Urokon (sodium 2,4,6-triiodo-3-acetylaminobenzoate), a new pyelographic medium, 43
Biologic fluids for counting radioelements, method of preparing, 626
material, Hg, Bi, Sb, and As in, simple and rapid analytical method for, 146
Black-Kleiner-Bolker blood test for malignant disease, clinical evaluation of, 136
Bleeding, gastroduodenal, Gelfoam and thrombin in, 890
Blood, acetaldehyde in, spectrophotometric method for determination of, a simple, 983
amino acids in, improved method for determination of, in small samples of, 640
and bone marrow of swine, effect of 2,6-diaminopurine on, 518
and urine, thiosulfate in, simple method for determination of, 152
aureomycin in, fluorophotometric estimation of, 123
Brucella studies on bank, in a general hospital, 440
chloride, direct iodometric colorimetric determination of, 637
donors, identification of, with a fluorescent dye, 634
ergothioneine levels in diabetes mellitus, 960
ethanol in, simple spectrophotometric determination of, by diffusion in an autoclave, 294
flow, splanchnic, in man by the bromsulfalein method; relation of peripheral plasma bromsulfalein level to the calculated flow, 923
lymphocytes and lymphatic tissue of intact and adrenalectomized mice, effect of 4-aminopteroylglutamic acid on, 271
of patient with herpetic rhinitis, recovery of herpes simplex virus from, 434
oxygen and carbon dioxide in, combined determination of, effect of various types of hemolytic agents in, 164
serum, diluted, globulin and total protein in, microphotelometric determination of, 976
test, Black-Kleiner-Bolker, for malignant disease, clinical evaluation of, 136
Bolen test, sedimentation rate, and Weltmann reaction, comparison of Huggins' tests with, in cancer, 708
Bone marrow of swine, effect of 2,6-diaminopurine on, 518
Brain homogenates of mouse, effects of Pyribenzamine on respiration of, 284
oxidations, depression of, studies on, 411
Bremer test, unreliability of, in staining of erythrocytes of diabetic and nondiabetic patients, 422
Bromsulfalein method of splanchnic blood flow in man; relation of peripheral plasma bromsulfalein level to calculated flow, 923
Brucella studies on bank blood in a general hospital, 440
types found in Georgia, isolation and incidence of, method of, 483

C

Cancer, a serum polysaccharide in, 408
comparison of Huggins' tests with sedimentation rate, Weltmann reaction, and the Bolen test in, 708
Capillary fragility and permeability, effect of rutin on, 933
Carbohydrate metabolism, effect of potassium deficiency on, 592
Cardiac lesions following venous catheterization of right auricle and coronary sinus of dogs, 287
Carinamide, (4'-carboxyphenylmethanesulfonanilide), renal extraction and excretion of, 87
Cations, removal of, from solutions and the rat's alimentary canal by H-form resins, 99
Cells, malignant, in vaginal secretions, a new vital stain for, 314
Central Society for Clinical Research, President's address, 2
Cerebrospinal fluid, globulin and total protein in, microphotelometric determination of, 976
Chemical analysis of guinea pig lung, a method of, for factors involved in pulmonary edema, 817
Chick embryo propagated mumps virus vaccine, immunologic response of children to injection of, as measured by the complement fixation test, 771
Chloride and chloride space in the dog, rates of turnover and biologic decay of, determined with the long-life isotope, Cl^{36}, 331
blood, direct iodometric colorimetric determination of, 637
Chloromycetin in serum or plasma, colorimetric method for determination of, 129
in vitro sensitivity of Bacillus proteus and Pseudomonas aeruginosa to, 205
of coliform bacilli to, 188
Cholesterol, serum, a probable precursor of adrenal cortical hormones, 504
Chylomicron counts, dilution as a source of error in, 815
Chylomicronemia, fat tolerance, and atherosclerosis, 373
Circulation, peripheral, effects of Priscol (a new sympatholytic drug) on, 50

Cirrhosis of liver, systemic and portal venous pressures in, 181
protein alteration in portal, as determined by electrophoresis, 167
Citrate salts, effect of, on distribution and excretion of beryllium, 854
Cl^{36}, the long-life isotope, rates of turnover and biologic decay of chloride and chloride space in dog determined with, 331
Coliform bacilli, in vitro sensitivity of, to seven antibiotics, 188
Colloid osmotic pressure determination, apparatus for, an improved design of, 117
Colorimetric determination of blood chloride, direct iodometric, 637
method for determination of Chloromycetin in serum or plasma, 129
of inulin in plasma and urine, a rapid, 475
Coronary sinus and right auricle of dogs, venous catheterization of, cardiac lesions following, 287
Counting in radiobiology, micropipette for preparation of samples for, 631
radioelements, influence of self-absorption, volatilization, and deliquescence in, 606
method of preparing biologic fluids for, 626
Culture of Endamoeba histolytica associated with a single bacterium, liquid medium composed of dehydrated ingredients for, 308
Cutler sedimentation rate and Weltmann serocoagulation reaction, comparative value of, in determining activity of rheumatic process in rheumatic fever, 220

D

Densiometric determination of heavy water, simple method for, 793
Diabetes mellitus, blood ergothioneine levels in, 960
experimental studies on, as produced by organic reagents, 568
Diabetic acidosis, potassium administration in, 842
Dialysis of serum and urine, rapid, for electrophoresis, 141
Dicumarolized patients, prothrombin determinations in, comparison of one-stage and bedside methods, 16
Dilution as source of error in chylomicron counts, 815
Dinitrophenol-induced hypermetabolism, effect of, on plasma and tissue lipids and atherosclerosis in cholesterol-fed chick, 351
Drying organisms and viruses, a useful menstruum for, 788
Dye, fluorescent, identification of blood donors with, 634

E

Eardrum, perforated, effect of, on basal metabolic rate, 348
Edema, pulmonary, method of chemical analysis of guinea pig lung for factors involved in, 817
Ehrlich reaction in urine, effect of refrigeration on, 328
Electrode, skin, an improved, 786
Electrophoresis, protein alteration in portal cirrhosis as determined by, 167
rapid dialysis of serum and urine for, 141
Electrophoretic and chemical estimations of human serum albumin, comparative, 76
fractionation of serum proteins, diagnostic value of, in asymptomatic portal cirrhosis, 403
Endamoeba histolytica associated with a single bacterium, liquid medium composed of dehydrated ingredients for, 308
Endotoxins of enteric bacilli, tolerance to action of, in patients convalescent from typhoid and paratyphoid fevers, 911
Enterococci and streptococci of viridans group, sensitivity of, to penicillin and streptomycin, determination of, 488
Enterogastrone, ineffectiveness of, in Mann-Williamson dogs, 603
Enzymatic histochemistry, sources of error in, 802
Erythroblastosis fetalis, occurrence of, in American Negroes, 544
Erythrocytes of diabetic and nondiabetic patients, staining of; unreliability of Bremer test, 422
susceptibility of human, to agglutination by influenza virus, 538
Ethanol in blood, simple spectrophotometric determination of, by diffusion in an autoclave, 294
Exercising a patient in the recumbent position, apparatus for, 317
Experimental diabetes mellitus, studies on, as produced by organic reagents, 568

F

Fat absorption, defective, following vagotomy, 362
in rat, 968
emulsions for oral nutrition, 968
tolerance, chylomicronemia, and atherosclerosis, 373
Fluorescent dye, identification of blood donors with, 634
Fluorophotometric estimation of aureomycin in blood and urine, 123
Folic acid in treatment of pernicious anemia, long-term evaluation of, 894

4-Aminopteroylglutamic acid, effect of, on blood lymphocytes and the lymphatic tissue of intact and adrenalectomized mice, 271
4-Hydroxycoumarin anticoagulant No. 63, effects of, upon prothrombin time in dogs and human beings, 8
4'-Carboxyphenylmethanesulfonanilide, renal extraction and excretion of, 87

G

Gamma globulin and zinc sulfate turbidity tests, comparison of results of, with electrophoretic determination of gamma globulins, 466
determinations, turbidimetric, in hepatobiliary diseases, 391
Gases, respiratory, suction tube for collection of, under diverse conditions, 324
Gastric acid secretion in human subjects, comparative effects of water, carbonated water, sodium chloride solution, and sodium bicarbonate solution on, 249
Gastroduodenal bleeding, Gelfoam and thrombin in, 890
Gelfoam and thrombin in gastroduodenal bleeding, 890
Globulin and total protein in cerebrospinal fluid or diluted blood serum, microphotelometric determination of, 976

H

Heart rate, control of, with intracardiac thermode, 703
Heat coagulability of serum proteins, factors influencing, 675
Hemagglutination test, Middlebrook and Dubos, for serum antibodies to products of tubercle bacilli, simple modification of, 303
Hemolytic agents in combined determination of oxygen and carbon dioxide in blood, effect of various types of, 164
disease of newborn, 24, 28
effect of radiation, 528
Heparin activity in vitro, indirect, quantitative method for estimation of, 446
assay, an accurate technique of, 111
sensitivity in man, effects of intravenous administration of commercial beef heparin on, 699
Heparin-protamine titration test, 446
Hepatic function, tests of, diagnostic value of, in asymptomatic portal cirrhosis, 403
Hepatobiliary diseases, turbidimetric gamma globulin determinations in, 391
Herpes simplex virus, recovery of, from blood of patient with herpetic rhinitis, 434
Heterophile antibody determinations, sheep cells for, preservation of, 300
reaction, value of, in lymphomatous diseases, 681
H-form resins, removal of cations from solutions and the rat's alimentary canal by, 99
Hg, Bi, Sb, and As in biologic material, simple and rapid analytical method for, 146
Histochemistry, enzymatic, sources of error in, 802
Histoplasmin collodion agglutination test, stability of, studies on, 780
Hormone, adrenocorticotropic, effect of, on uropepsin excretion, 899
Hospital equipment, sterilization of, use of ethylene oxide for, 823
Huggins' tests, comparison of, with sedimentation rate, Weltmann reaction, and the Bolen test, in cancer, 708
Hypermetabolism, thyroid- and dinitrophenol-induced, effect of, on plasma and tissue lipids and atherosclerosis in the cholesterol-fed chick, 351
Hypouricemia, with evidence for tubular elimination of uric acid, 865

I

In vitro activity of heparin, indirect, quantitative method for estimation of, 446
of Nisulfazole, comparison of, with other sulfonamides, 875
Infectious mononucleosis, liver function tests in, 688
Influenza virus, agglutination by, susceptibility of human erythrocytes to, 538
Intracardiac thermode, control of heart rate with, 703
Inulin in plasma and urine, determination of, rapid colorimetric method for, 475
Iodine, concentration of, in human stomach and other tissues, as determined with radioactive iodine, 497
radioactive, studies on lymphocytes from persons treated with, 885
serum precipitable, artifactual values of, 280
Isotope, Cl^{36}, rates of turnover and biologic decay of chloride and chloride space in dog determined with, 331

J

Jaundice, liver function and, in pneumonia, 556

K

Kidney function tests, para-aminohippuric acid (PAH) in, observations on use of, 829
thiosulfate determination in, 152

L

Laboratory methods, 111, 294, 446, 626, 780, 976
  microbiologic, nonautomatic pipetting devices for, 648
Letter from the Editor, 1
Lipemic nephrosis, proteinuria of, influence of sodium salicylate and sodium gentisate on, 737
Liver biopsy, diagnostic value of, in asymptomatic portal cirrhosis, 403
  cirrhosis of, systemic and portal venous pressures, 181
  function and jaundice in pneumonia, 556
    tests in infectious mononucleosis, 688
  in pneumococcal pneumonia, 556
Lung, guinea pig, chemical analysis of, a method of, for factors involved in pulmonary edema, 817
Lymphocytes from persons treated with radioactive iodine, studies on, 885
Lymphomatous diseases, heterophile antibody reaction in, value of, 681

M

Malignant cells in vaginal secretions, a new vital stain for, 314
  disease, Black-Kleiner-Bolker blood test for, clinical evaluation of, 136
Mann-Williamson dogs, ineffectiveness of enterogastrone in, 603
Menstruum for drying organisms and viruses, a useful, 788
Metabolism, carbohydrate, effect of potassium deficiency on, 592
Microbiologic laboratory, nonautomatic pipetting devices for, 648
Microcolorimetric analysis, a universal syringe buret and its use in, 810
Microdetermination of plasma phospholipids by trichloroacetic acid precipitation, 155
Micromethod for pyruvic acid determination, 320
Microphotelometric determination of globulin and total protein in cerebrospinal fluid or diluted blood serum, 976
Micropipette for preparation of samples for counting in radiobiology, 631
Middlebrook and Dubos hemagglutination test for serum antibodies to products of tubercle bacilli, simple modification of, 303
Mononucleosis, infectious, liver function tests in, 688
Mumps virus vaccine, chick embryo propagated, immunologic response of children to injection of, as measured by complement fixation test, 771

N

Neomycin and other antibiotics, effect of, on bacteria, viruses, and protozoa, study of, 428
Newborn, hemolytic disease of, 24, 28
Nisulfazole, in vitro activity of, comparison of, with other sulfonamides, 875
Nitrogen mustard therapy in polycythemia vera, clinical study of, 252
Nutrition, fat emulsions for oral, 968

O

Organic reagents, experimental diabetes mellitus produced by, studies on, 568
Organisms and viruses, drying, a useful menstruum for, 788
  tetrathionate broth in isolation of, 654
Oxygen and carbon dioxide in blood, combined determination of, effect of various types of hemolytic agents in, 164

P

PAH in kidney function tests, observations on use of, 829
Para-aminohippuric acid (PAH) and sodium thiosulfate, determination of, in renal clearance tests, 836
  in kidney function tests, observations on use of, 829
Parasites in human excretions, detection of, 121
Penicillin and streptomycin, determination of sensitivity to, of enterococci and streptococci of the viridans group, 488
  in vitro sensitivity of Bacillus proteus and Pseudomonas aeruginosa to, 205
    of coliform bacilli to, 188
  procaine, effect of, on bacteriostatic action of sulfadiazine, 63
Pentobarbital, comparative influence of, upon dog cortex, caudate nucleus, and hypothalamus, 411
Peripheral circulation in man, effects of Priscol (a new sympatholytic drug) on, 50
Pernicious anemia, folic acid in treatment of, long-term evaluation of, 894
  urinary phenol fractions in, effect of vitamin B_{12} on, 35
  vitamin B_{12} concentrate in maintenance of, 713
Petri plates, uniformly mixed poured, method for securing, by mechanical means, 313
Pipetting devices, nonautomatic, for microbiologic laboratory, 648
Plasma and tissue lipids, effect of thyroid- and dinitrophenol-induced hypermetabolism on, in cholesterol-fed chick, 351
  Chloromycetin in, colorimetric method for determination of, 129
  inulin in, determination of, rapid colorimetric method for, 474

Plasma—Cont'd
phospholipids, microdetermination of, by trichloroacetic acid precipitation, 155
viscosity, 667
Pneumonia, liver function and jaundice in, 556
pneumococcic, liver in, 556
treatment of, with aureomycin, 215
Pneumoperitoneum, pulmonary emphysema treated with, ventilation measurements in, 945
Polycythemia vera, nitrogen mustard therapy in, clinical study of, 252
Polymyxin, in vitro sensitivity of Bacillus proteus and Pseudomonas aeruginosa to, 205
of coliform bacilli to, 188
Portal cirrhosis, asymptomatic, diagnostic value of liver biopsy, tests of hepatic function, and electrophoretic fractionation of serum proteins in, 403
protein alteration in, as determined by electrophoresis, 167
Potassium, administration of, to patients with prolonged vomiting and diabetic acidosis, 842
deficiency, effect of, on carbohydrate metabolism, 592
Pressure pump for administering intra-arterial or intravenous fluids, 993
Priscol, a new sympatholytic drug, effects of, on peripheral circulation in man, 50
Procaine penicillin, effect of, on bacteriostatic action of sulfadiazine, 63
Progesterone and anhydrohydroxyprogesterone, comparative study of oral administration, 265
Prostatic acid phosphatase in serum, detection of, by alcohol inactivation technique, 161
Protein alteration in portal cirrhosis as determined by electrophoresis, 167
concentration and serum water or weight, relationships between, 67
Proteinuria of lipemic nephrosis, influence of sodium salicylate and sodium gentisate on, 737
Prothrombin determinations in Dicumarolized patients, comparison of one-stage and bedside methods, 16
time, effects of 4-hydroxycoumarin anticoagulant No. 63 upon, in dogs and human beings, 8
Protozoa, effect of neomycin and other antibiotics on, study of, 428
Pseudomonas aeruginosa and Bacillus proteus, in vitro sensitivity of, to seven antibiotics, 205
Pulmonary edema, method of chemical analysis of guinea pig lung for factors involved in, 817
emphysema treated with pneumoperitoneum, ventilation measurements in, 945
Pump, pressure, for administering intra-arterial or intravenous fluids, 993
Pure delight (President's address, Central Society for Clinical Research), 2
Pyelographic medium, Urokon (sodium 2,4,6-triiodo-3-acetylaminobenzoate), a new, biochemical studies on, 43
Pyribenzamine, effects of, on respiration of mouse brain homogenates, 284
Pyruvic acid determination, a micromethod, 320

R

Radiation, hemolytic effect of, 528
injury and recovery, role of spleen in, 746
Radioactive iodine, determination of concentration of iodine in human stomach and other tissues with, 497
studies on lymphocytes from persons treated with, 885
Radiobiology, counting in, micropipette for preparation of samples for, 631
Radioelements, counting of, influence of self-absorption, volatilization, and deliquescence in, 606
method of preparing biologic fluids for, 626
Refrigeration, effect of, on Ehrlich reaction in urine, 328
Renal clearance tests, sodium thiosulfate and para-aminohippuric acid in, determination of, 836
extraction and excretion of carinamide, 87
Resins, H-form, removal of cations from solutions and the rat's alimentary canal by, 99
Respiration of mouse brain homogenates, effects of Pyribenzamine on, 284
Respiratory gases, suction tube for collection of, under diverse conditions, 324
Rh agglutinating antiserum preservation of, with sodium azide, 297
antiserum, albumin-fortified and unfortified blocking-type, preservation of, with sodium azide, 988
Rheumatic fever, studies on, 220
Rhinitis, herpetic, blood of patient with, recovery of herpes simplex virus from, 434
Rutin, effect of, on capillary fragility and permeability, 933

S

Salicyl derivatives, renal excretion of, during aspirin therapy, influence of urinary pH on, 237
Salmonella, tetrathionate broth in isolation of, 654
Secretin, assay and distribution of, 366
Sedimentation rate and serum polysaccharide in clinic patients, variations in, 869
Cutler, and Weltmann serocoagulation reaction, comparative value of, in determining activity of rheumatic process in rheumatic fever, 220

Sedimentation rate—Cont'd
Weltmann reaction, and the Bolen test, comparison of Huggins' tests with, in cancer, 708
Sensitivity, in vitro, of Bacillus proteus and Pseudomonas aeruginosa to seven antibiotics, 205
of coliform bacilli to seven antibiotics, 188
Serum albumin, comparative electrophoretic and chemical estimations of human; evaluation of six methods, 76
and urine, rapid dialysis of, for electrophoresis, 141
Chloromycetin in, colorimetric method for determination of, 129
cholesterol, a probable precursor of adrenal cortical hormones, 504
gamma globulin concentration, estimation of, by turbidimetry, 459
polysaccharide and sedimentation rate in clinic patients, variations in, 869
in cancer, 408
precipitable iodine, artifactual values of, 280
prostatic acid phosphatase in, detection of, by alcohol inactivation technique, 161
proteins, heat coagulability of, factors influencing, 675
water or weight and protein concentration, relationships between, 67
Sheep cells for heterophile antibody determinations, preservation of, 300
Shigella, tetrathionate broth in isolation of, 654
Sickle cell anemia, aplastic crisis in, 721
Skin electrode, an improved, 786
Sodium azide, preservation of albumin-fortified and unfortified blocking-type Rh antiserum with, 988
of Rh agglutinating antiserum with, 297
salicylate and sodium gentisate, influence of, on proteinuria of lipemic nephrosis, 737
thiosulfate and para-aminohippuric acid, determination of, in renal clearance tests, 836
2,4,6-triiodo-3-acetylaminobenzoate (Urokon), a new pyelographic medium, biochemical studies on, 43
Spectrophotometric determination of ethanol in blood, simple, by diffusion in an autoclave, 294
method for determination of acetaldehyde in blood, a simple, 983
Splanchnic blood flow in man by the bromsulfalein method; relation of peripheral plasma bromsulfalein level to calculated flow, 923
Spleen, role of, in radiation injury and recovery, 746
Sprue, sucrose absorption in, 622
Stain for malignant cells in vaginal secretions, a new vital, 314
Staining of erythrocytes of diabetic and nondiabetic patients; unreliability of Bremer test, 422
Sterilization of hospital equipment, use of ethylene oxide for, 823
Streptococci and enterococci of viridans group, sensitivity of, to penicillin and streptomycin, determination of, 488
Streptomycin and penicillin, determination of sensitivity to, of enterococci and streptococci of the viridans group, 488
in vitro sensitivity of Bacillus proteus and Pseudomonas aeruginosa to, 205
of coliform bacilli to, 188
Sucrose absorption in sprue, 622
Sulfadiazine, bacteriostatic action of, effect of procaine penicillin on, 63
Surgery, utilization of amino acids following, 385
Sympatholytic drug (Priscol), a new, effects of, on peripheral circulation in man, 50
Syringe buret, a universal, and its use in microcolorimetric analysis, 810

T

Test, histoplasmin collodion, stability of, studies on, 780
Tetrathionate broth in isolation of Salmonella, Shigella, and Paracolon bacilli, 654
Thermode, intracardiac, control of heart rate with, 703
Thiosulfate determination in kidney function tests, 152
in blood and urine, simple method for determination of, 152
Thrombin and Gelfoam in gastroduodenal bleeding, 890
Thrombocyte count in man, effect of intravenous administration of commercial beef heparin on, 699
Trichloroacetic acid precipitation, microdetermination of plasma phospholipids by, 155
Turbidimetric gamma globulin determination in hepatobiliary diseases, 391
Turbidimetry, estimation of serum gamma globulin concentration by, 459
Turbidity tests, gamma globulin and zinc sulfate, comparison of results of, with electrophoretic determination of gamma globulins, 466
2,6-Diaminopurine, effect of, on blood and bone marrow of swine, 518
Typhoid and paratyphoid fevers, tolerance to action of endotoxins of enteric bacilli in patients convalescent from, 911
infections in mice, experimental, comparison of effect of nine antibiotics on, 663

U

Uric acid, tubular elimination of, evidence for, in hypouricemia, 865
Urinary pH, influence of, on renal excretion of salicyl derivatives during aspirin therapy, 237
phenol fractions in pernicious anemia, effect of vitamin B_{12} on, 35
Urine, amino acids in, improved method for determination of, in small samples of, 640
aureomycin in, fluorophotometric estimation of, 123
Ehrlich reaction in, effect of refrigeration on, 328
inulin in, determination of, rapid colorimetric method for, 475
Urokon (sodium 2,4,6-triiodo-3-acetylaminobenzoate), a new pyelographic medium, biochemical studies on, 43
Uropepsin excretion, effect of adrenocorticotropic hormone upon, 899

V

Vaccine, chick embryo propagated mumps virus, immunologic response of children to injection of, as measured by complement fixation test, 771
Vagotomy, defective fat absorption following, 362
Venous catheterization of right auricle and coronary sinus of dogs, cardiac lesions following, 287
pressures, systemic and portal, in cirrhosis of liver, 181
Ventilation measurements in pulmonary emphysema treated with pneumoperitoneum, 945
Virus, herpes simplex, recovery of, from blood of patient with herpetic rhinitis, 434
influenza, agglutination by, susceptibility of human erythrocytes to, 538
Viruses, effect of neomycin and other antibiotics on, study of, 428
Vitamin B_{12} concentrate in maintenance of pernicious anemia, 713
effect of, on urinary phenol fractions in pernicious anemia, 35
Vomiting, prolonged, potassium administration in, 842

W

Water, densiometric determination of heavy, simple method for, 793
Weltmann reaction, Bolen test, and sedimentation rate, comparison of Huggins' tests with, in cancer, 708
serocoagulation reaction and Cutler sedimentation rate, comparative value of, in determining activity of rheumatic process in rheumatic fever, 220

Z

Zinc sulfate and gamma globulin turbidity tests, comparison of results of, with electrophoretic determination of gamma globulins, 466
